

## Because Your Time And Their Lives Matter

Contributed by Beate

Recently I was introduced to a new system which allows you to keep track about all your pet files easily. I thought this was one of the greatest ideas and I would like you to read what the company has to say about their product.

PetSummary.com allows you to organize, access, and share your pet's important information with anyone, anywhere, at any time. Whether preparing a pet sitter, getting ready for a trip, or rushing to the emergency room, PetSummary.com makes it easy to have the right information at your fingertips.

Our subscribers use their PetSum Card<sup>®</sup> to organize and share contact information, daily routines, medications, comments and more; access and print their authentic vaccine records from any online computer; and communicate as much up to date information as they wish about their lost pet with the Guardian Pet Tag<sup>®</sup>.

It takes a few short minutes to be prepared for any situation. Protect your pet with PetSummary.com today.
